

UIPATH AGENTHACK · MAESTRO CASE

Stop the right shipments before one bad product becomes dozens of bad customer moments.

A governed product-safety containment workspace. One safety signal becomes a human-approved stop-ship on the exact right orders, with a saved record to prove it.

THE OUTCOME

One approved action freezes 37 in-flight orders.

ORDERS HELD

37

verified 37 of 37

ORDER VALUE HELD

\$360,480

across 3 warehouse zones

PROOF ARTIFACT

**Stop-Ship
Packet**

RB-PKT-2049 · reopenable

Before a single bad unit could ship. This is where the demo ends, so you know where it is going.

A quality lead, a bad lot, and orders still shipping.

Right now the choices are both bad

- **Freeze the whole warehouse** and break shipping for every good order.
- **Chase orders by hand** in a spreadsheet while bad units keep going out the door.

INCOMING SIGNAL

Battery overheating · lot RB-2049

Customer report from the support portal. Matching orders are still marked ● Ready to Ship . Confidence 0.92.

This job repeats. The clock is the enemy, and the cost of overreacting is as real as the cost of missing one.

DEMO SETUP

One durable case. One agent. One human sign-off.

1 Pick a role, open case RB-2049

2 Run Containment

3 QA approves the stop-ship

4 Packet saved + reopenable

QA approval checkpoint

ApproverAlex Morgan · Quality Ops Lead

Scope37 orders

New statusQuarantined - QA Review

Approving will mutate stored order states to Quarantined - QA Review. This is the governance line — the agent cannot bypass it.

Approve Stop-Ship

The Batch Containment Agent

- Maps the lot to its **SKU** and warehouse
- Fans out to **37 orders** to hold
- **11 excluded**, each with a reason
- Status: **Awaiting QA Approval**

Nothing has changed yet.

THE GOVERNANCE LINE

The agent cannot cross the human checkpoint.

BEFORE APPROVAL

- Ready to Ship **37**

A QA manager reviews the exact scope, then clicks **Approve Stop-Ship.**

AFTER APPROVAL

- Quarantined - QA Review **37**

Only now does real order state change. Approved by Priya Shah, QA Manager.

This is the UiPath Maestro Case human task. It is the line the agent cannot bypass.

RESULT REVEAL

37 quarantined, verified, and saved.

The screenshot displays the 'Red Batch' interface for case RB-PKT-2049. The left sidebar shows navigation options: 'Active Case', 'All Cases', and a search bar with 'Reopen / Search'. The main content area shows the case details: 'RED BATCH' (STOP-SHIP PACKET), 'RB-PKT-2049' (37 orders quarantined for QA review), and a 'Final' status. Below this, an 'Order-state change' section shows a transition from 'BEFORE' (Ready to Ship, 37) to 'AFTER' (Quarantined - QA Review, 37). A 'Risk signal' section provides details: signal (SIG-RB-2049), summary (Customer reports battery overheating during normal use of the RB Power Pack 10000), source (Customer Support Portal), lot / SKU (RB-2049 · RB Power Pack 10000), warehouse (LAX-01), and severity / confidence (High · 0.92).

VERIFICATION

STOP-SHIP PACKET · RB-PKT-2049

- Before / after diff
- Risk signal + evidence
- Named approver
- 11 exclusions, with reasons

Reopen later by order, lot, case, or packet id. Search O-1042 finds the order and the case that froze it.

Confident cases act. Unsure cases ask.

CASE RB-7712

Confidence 0.54 · below the 0.70 floor

- The agent **refuses to act alone**
- Routes to ● **Human Review Required**
- Proposes a **partial 5-order hold**
- Opens an **evidence task**

Red Batch

ACTIVE CASE / RB-7712

Human Review Required

The system is not confident enough to act automatically. Review the ambiguity and complete the evidence task to continue.

Ambiguous Overheating Signal
Case ID: RB-7712 · Opened May 18, 2026, 5:41 PM

● Human Review Required

Risk summary			
LOT	WAREHOUSE	SEVERITY	CONFIDENCE
RB-7712	LAX-01	High	0.54

Confidence below full-stop threshold

0 ————— threshold 0.70 ————— 1.00

Ambiguity reason
Customer reports overheating, but thermal readings in warehouse logs are within normal range and lot metadata is partially inconsistent across sources.

Evidence task 1 task · Queued

Review customer photos and thermal logs
Compare submitted evidence against threshold criteria to confirm or rule out the suspected lot.

Partial scope		
LOCATION	CANDIDATE ORDERS	limited affected scope
		PROPOSED HOLD
LAX-01-A1	5	5
LAX-01-B2	5	0
LAX-01-C3	4	0

Recommended next step
Complete the evidence task to refine confidence, or approve a partial hold of the highest-confidence zone now. The case resumes once confidence meets the threshold.

Approve partial hold (5)
